

RESOURCES FOR SCHOOL GARDENS

Toledo GROWs Community Garden Resources

<https://www.teachervision.com/plants/resource/62330.html>

Use these worksheets, references, and activities to teach children about soil, fruits, vegetables, and gardening. Enrich your curriculum with resources about flora, review garden tools, and enhance lessons with clip art images. Science activities about plant growth and development are a great way to introduce younger children to biology.

<http://www.kidsgardening.org/>

School Gardening engages students by providing a dynamic environment to observe, discover, experiment, nurture and learn. School Gardens are living laboratories where interdisciplinary lessons are drawn from real life experiences, encouraging students to become active participants in the learning process.

<http://www.nourishinteractive.com/>

Nourish Interactive is your free one stop resource for fun nutrition games for kids, interactive nutrition tools and tips for parents and health educators to use to promote healthy living for the whole family. Created by nutrition and health care professionals, Nourish Interactive's nutrition education website gives children and families the knowledge and skills they need to make healthy choices.

Explore a world of possibilities in the garden and on your plate using ten inquiry-based lessons that engage 5th and 6th graders in growing, harvesting, tasting, and learning about fruits and vegetables. More information is also available at Dig In! At Home Parent Booklet and Dig In! Posters.

<http://www.teachinginnaturesclassroom.org/>

Thanks to generous support from the Wisconsin Partnership Program at the University of Wisconsin School of Medicine and Public Health, paperback and ebook editions of Teaching in Nature's Classroom are available for free to educators around the world.
